Summary

Experienced frontend developer specializing in React, React Native, and TypeScript. Demonstrated strong leadership skills by successfully leading and managing teams to deliver high-quality projects within tight deadlines. Proven ability to effectively prioritize and manage time to ensure project completion. Consistently achieved client satisfaction through efficient problem-solving and strategic decision-making. Seeking new opportunities to leverage expertise and contribute to the success of innovative software development projects.

Experience

Senior Frontend Developer • Aurodigital   **Dec 2022 - Jul 2023**

As a Senior Frontend Developer and Team Lead, I had the privilege of spearheading a team of three talented junior developers to create a cutting-edge Aggregated Exchange SaaS (Crypto Exchange) platform tailored for institutional-level clients. This role required a deep understanding of frontend development, leadership skills, and the ability to optimize performance for real-time ordering of digital assets.
Tech Stack
React, React-native, Typescript, Redux, Rxjs and Websockets

Software Engineer • Metafic   **Feb 2022 - Dec 2022**

Driven by strategy, design, and passion, we work on end to end solutions for mobile apps, web, XR, eCommerce, and softwares

Build an Android mobile app using React-Native which deals with advertising 24/7 on tabs fitted inside the cab

Developed a web-app for Four seasons Beverly hills for operating there luxury car providing services for clients staying in the hotels
Worked on e-learning platform also, Refactored it's code and changed it's patterns to DRY approach of Reactjs

Frontend Developer • GraphicWeave   **Jun 2020 - Feb 2022**

Designing and implementing the front-end using HTML5, CSS3, ReactJS , Nextjs

1. BusyBee-Vendor-Mobile-App (ios/android) BusyBee is a platform where vendors can connect directly to organizations, place orders and enquiries, so you are not overly dependent on your sales agents
Worked primarily as the Front End Developer for this app.
Mobile app prototype conversion to working screens using React-native.
Used Component based approach for code reusability.
Used Shopify Restyles for building UI upon a design system.Used Pull-State for global state management instead of using redux's large setup and not overkilling the code with a large intial setup

required in Redux

2. Unilife :- A student centric platform of it's kind and will host the largest student community in India.It will help empower students with greater purchasing potential
Worked primarily as the Front End Developer for the Unilife Vendor Panel in ReactJS

3. EverywherAgents: Build an admin panel in Reactjs and AntDesign and build a landing page in nextjs. And contributed in building two mobile apps in React-Native

---

Education

Bachelor of Computer Applications · Islamia College of Science & Commerce, Srinagar   **Mar 2015 - May 2019**

Computer Science · Grade: 7.5

I participated in a comprehensive, globally recognized program focused on computer sciences and data structures. This immersive educational experience had a profound impact on my understanding and practical application of these subjects. Throughout the program, I actively engaged in dynamic coursework and hands-on projects, enabling me to develop a deep knowledge of computer sciences and data structures. By leveraging cutting-edge technology and industry best practices, I gained valuable insights into solving complex problems and optimizing system efficiency. This curriculum cultivated a strong foundation in programming languages, algorithms, and database management, equipping me with the skills necessary to effectively analyze and manipulate large datasets. Through collaborative group projects and discussions with peers from diverse backgrounds, I honed my ability to communicate and collaborate within multidisciplinary teams. Ultimately, this exceptional education has empowered me with the expertise and confidence to tackle real-world challenges in the field of computer sciences and data structures.

Projects

Everywhereagents   **Mar 2021 - Jul 2023**

GraphicWeave

- Created a visually appealing landing page for everywhereagents.com using Next.js, showcasing strong attention to detail and design skills.
- Developed an efficient and user-friendly admin panel utilizing React and Ant Design, demonstrating proficiency in front-end development.
- Successfully built two mobile apps for both iOS and Android platforms using React Native, showcasing versatile skills in cross-platform app development.

Screenzy   **Mar 2022 - Jul 2023**

Metafic

- Developed an Android app using React Native to implement geo-fencing for advertising purposes on location
- Successfully integrated geo-fencing functionality into the app to trigger specific ads based on the user's location
- Implemented a user-friendly interface with tabs inside cabs to display the targeted advertisements
- Effectively utilized React Native's capabilities to create a seamless and interactive user experience

- Demonstrated proficiency in mobile app development and problem-solving skills through the project
- Designed and implemented a robust and efficient system to deliver targeted ads to users in real-time
- Achieved the project's objective of effectively delivering advertisements to specific locations, resulting in increased brand exposure and customer engagement

Digital Asset Management Software   **Feb 2023 - Jul 2023**

Aurodigital

- Developed and implemented digital asset management software
- Aggregated order-book data from multiple exchanges for comprehensive market analysis
- Increased efficiency of asset management by providing a centralized platform for monitoring and trading
- Improved decision-making through real-time data analysis and visualization
- Streamlined trading process by accessing and executing trades across multiple exchanges from a single interface
- Enhanced profitability through better understanding of market trends and optimal trading strategies
- Facilitated risk management by monitoring and analyzing market liquidity and order flow
- Designed user-friendly interface for easy navigation and interaction with the software
- Contributed to the growth of digital asset trading by providing a reliable and comprehensive solution for market participants.

Skills

Tailwindcss, Jest, Webpack,
React.js, Next.js, JavaScript, Typescript, HTML5, CSS3, Material UI, Redux-toolkit, Axios, Responsive web design, Git & GitHub, Figma, Jira,,
HTML 5 | CSS3, React Native | Redux | Typescript | React Native Firebase
